

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application. An identifier indicating the status of each claim is provided.

Listing of Claims

1-12. (Canceled)

13. (New) A video recording/reproducing apparatus capable of recording video into a recording medium and reproducing the video from the recording medium, comprising:

- means for recording video signals and identifying signals indicating the content of the video signals, into a recording medium;
- means for generating a title list of videos recorded in the recording medium using said identifying signals;
- means for receiving a user indication of sorting the video titles;
- means for sorting the titles in the title list in response to a received user indication;
- means for providing the sorted title list to the user; and
- means for reproducing one or more videos in the sorted title list.

14. (New) The video recording/reproducing apparatus according to claim 13, wherein the means for sorting sorts the video titles in order of date, title, classification or recording in response to a received user indication.

15. (New) The video recording/reproducing apparatus according to claim 13,
wherein the means for sorting sorts the titles of the recorded video that has been
automatically recorded by a timer in the video signal recording/reproducing apparatus that have
not been reproduced, in the order of recording.

16. (New) The video recording/reproducing apparatus according to claim 13
wherein the means for reproducing sequentially reproduces videos in a sorted title list.

17. (New) The video recording/reproducing apparatus according to claim 16,
wherein the means for reproducing sequentially reproduces an introduction of each video in a
sorted title list.

18. (New) The video recording/reproducing apparatus according to claim 13
wherein the means for providing provides thumbnail images corresponding to the sorted titles.

19. (New) A video recording/reproducing method for recording video into a
recording medium and reproducing the video from the recording medium, comprising:
recording video signals and identifying signals indicating the content of the video
signals, into a recording medium;
generating a title list of videos recorded in the recording medium using said
identifying signals;
receiving a user indication of sorting the video titles;

sorting the titles in the title list in response to a received user indication;
providing the sorted title list to the user; and
reproducing one or more videos in the sorted title list.

20. (New) The video recording/reproducing method according to claim 19,
wherein the sorting step sorts the video titles in order of date, title, classification
or recording in response to a received user indication.

21. (New) The video recording/reproducing method according to claim 19,
wherein the means for sorting sorts the titles of the recorded video that has been
automatically recorded by a timer in the video signal recording/reproducing apparatus that have
not been reproduced, in the order of recording.

22. (New) The video recording/reproducing method according to claim 19
wherein the reproducing step sequentially reproduces videos in a sorted title list.

23. (New) The video recording/reproducing method according to claim 22,
wherein the reproducing step sequentially reproduces an introduction of each video in a sorted
title list.

24. (New) The video recording/reproducing method according to claim 19
wherein the providing step provides thumbnail images corresponding to the sorted titles.
